

PRECISION
RAIL AND MFG

WHO WE ARE

Precision Rail and Mfg.

50+

Years of Excellence

Industries Served
10+ Industries

ISO Certification
ISO:9001:2015

Production Machining
Tier One Supplier

Railroad Products
Freight & Transit

Production Machining

MEET OUR TEAM

Combining **more than 200 years** of experience in manufacturing engineering, processing, Six-sigma protocols and quality control practices

Production Machining

OUR QUALITY PROCESS

Precision Inspection

Our labs feature CMMs, comparators, Millipore cleanliness testing, and a full range of gages to verify product compliance with tight tolerances.

Process Control

Quality control plans are developed for every part and operation, guiding our machinists and quality team to consistent, high-precision results.

Data-Driven

We leverage SPC data on key and critical characteristics to maintain process capability and ensure parts meet customer print specifications.

Quality Software

Our quality operations are powered by PC-DMIS, enabling accurate, repeatable inspection and seamless data integration.

Production Machining

TURNKEY SERVICES

Pre-Production

We produce high-precision CNC pre-production prototypes, helping refine designs and accelerate time to market with accuracy and efficiency.

Procurement

Our vast knowledge of global procurement optimizes cost-effective and timely deliveries to ensure a seamless production timeline.

Production

Utilizing advanced technology and rigorous quality control processes, we deliver precise, consistent CNC-machined parts with tight tolerances.
